1. What institution agreed to be responsible for web standards in 1994? 1 / 1 point
 - ☐ CERN
 - ☐ Cascading Style Sheets (CSS)
 - ☐ Stanford
 - ☐ HTML Standards Organization (HSO)
 - ☒ World-Wide-Web Consortium (W3C)
 - ☐ University of Michigan
 - ☐ Request-Response Congress (RRC)

Correct
2. Between 1990 and 2006 the number of servers connected to the web grew from what to what? 1 / 1 point
 - ☒ 1 server to 120 million servers
 - ☐ 2 servers to 500 million servers
 - ☐ 1 server to 1 billion servers
 - ☐ 100 servers to 10 billion servers

Correct
3. What browser did Netscape ultimately turn into? 1 / 1 point
 - ☐ Internet Explorer
 - ☒ Firefox
 - ☐ Chrome
 - ☐ Safari

Correct
4. How did the Mozilla foundation earn their money? 1 / 1 point
 - ☐ They were bought out by Google for \$2.4 billion
 - ☒ They added a search bar to their browser, and Google paid for the traffic directed to them.
 - ☐ They received a \$10 million dollar endowment from Warren Buffet
 - ☐ They sold the browser for \$25 per license

Correct
5. What web technology does Brendan Eich include as part of creating the capabilities we refer to as HTML5? 1 / 1 point
 - ☒ Javascript
 - ☐ PHP
 - ☐ Ruby on Rails
 - ☐ YouTube

Correct
6. Why did JavaScript never fail in the beginning, as most new programming languages do? 1 / 1 point
 - ☐ It was written by a team of 1000 computer scientists.
 - ☐ It was carefully crafted over the course of several years before being released.
 - ☒ It was written by someone who had prior experience constructing a language, and knew what pitfalls to avoid in creating the initial product.
 - ☐ They convened a conference with 100 computer scientists and had everyone vote on what features to include.

Correct
7. What was Mitchell Baker "fired" from Netscape for? 1 / 1 point
 - ☐ For giving trade secrets to Microsoft
 - ☐ Because she added several badly-designed tags (like blink) to HTML without approval
 - ☐ For making the Netscape browser display a disrespectful pop-up message whenever it was viewing www.aol.com
 - ☒ For repeatedly giving priority to the needs of the open source community over the needs of the commercial version of Netscape.

Correct
8. What was Tim Berners Lee's goal with establishing web standards? 1 / 1 point
 - ☐ To insure that Netscape would be able to control the future directions of the web
 - ☒ To prevent the proprietary Balkanization of the web
 - ☐ To make sure the CERN browser was the only browser in the marketplace
 - ☐ To make sure that Facebook would be held accountable for their privacy policies

Correct
9. Why did Jeff Bezos choose to start Amazon.com by selling books? 1 / 1 point
 - ☐ Because the ISBN number allowed each book to be broken into packets and routed across the network for remote printing
 - ☐ Books were the easiest category of items to ship.
 - ☒ Books are the category of items that have the most different products, making it impossible to have a brick and mortar store with the same level of inventory.
 - ☐ Because Apple's iTunes store had already cornered the market for music tracks
 - ☐ Books were the easiest item to track because of their ISBN catalogue numbers.

Correct
